PROFESSIONAL SUMMARY

Full-Stack Developer and Systems-Oriented Team Lead with 3+ years of experience building, deploying, and maintaining production web platforms and internal systems. Currently leading architecture and delivery of business-critical websites while serving as the primary technical point of contact for stakeholders. Strong focus on reliability, scalable structure, secure deployment, and disciplined SDLC execution.

EXPERIENCE

Z Aviation Consulting   Remote - Australia
IT Developer Team Lead (Independent Contractor)   August 2025 – Present

- Led planning, architecture, and development of 3+ company websites using WordPress and headless CMS strategy for phased delivery aligned with business timelines
- Defined project requirements and technical specifications through stakeholder discussions and documented PRDs
- Designed user flows, wireframes, and design system in Figma to align UI/UX with business needs
- Architected frontend stack (Next.js, Tailwind CSS) with backend integration (WordPress headless, Supabase) for scalable builds
- Coordinated implementation, task tracking, and code reviews as acting team lead to ensure quality and delivery consistency
- Built, deployed, and maintained websites on VPS infrastructure, including server configuration and production releases with 99% uptime, reducing deployment errors and improving release reliability
- Supported internal tools and automation workflows, resolving issues and improving operational reliability
- Acted as primary technical point of contact for non-technical stakeholders, troubleshooting and explaining system behavior

SmartRetry (Fintech Startup)   Remote - Israel
Web Platform Engineer (Project-Based)   September 2025 – December 2025

- Built and maintained a production-grade fintech marketing platform using Next.js, TypeScript, Tailwind CSS, and Headless WordPress.
- Implemented CMS-driven directories, search, filtering, FAQs, glossary modules, and internal utilities.
- Owned platform lifecycle from architecture planning through deployment and iterative improvements.
- Delivered UI/UX refinements, performance optimizations, and technical support under startup constraints.

Creaxon, Inc.   Makati/Remote
Junior Full Stack Developer (Full-Time)   May 2024 – May 2025

- Supported and maintained 10+ production websites, handling updates, fixes, and post-deployment checks.
- Implemented responsive UI from Figma designs, ensuring usability across devices.
- Built and customized websites using WordPress and Shopify, managing themes, plugins, and configurations.
- Assisted with SEO hygiene tasks including metadata, structure, and performance improvements.
- Managed deployments via Cloudways, including SSH and SFTP access.
- Collaborated with team members using GitLab for version control and release coordination.

Full-Stack Developer & Project Manager   Rosario, Cavite
Freelance / Project-Based   February 2023 – April 2024

- Led end-to-end delivery of multiple client projects, managing scope, timelines, and technical execution
- Guided a small development team through code reviews and enforced scalable coding standards
- Translated business requirements into structured technical plans and implementation decisions
- Built 10+ responsive websites using React and Tailwind CSS with strong cross-device performance
- Integrated third-party and custom APIs with Supabase and Node.js for dynamic functionality
- Streamlined deployments using CI/CD (GitHub, Vercel) and maintained clean Git workflows

Campus Library, Cavite State University – CCAT   Rosario, Cavite
Lead Programmer (Internship)   September 2023 – January 2024

- Lead the development of a Python-based desktop application to monitor library computer users usage and generate reports.
- Automated internal tracking workflows and provided technical support for hardware and software issues.

EDUCATION

Cavite State University - CCAT Campus   **Rosario, Cavite**
Bachelor of Science in Information Technology   April 2024
Thesis: SOCA: AI-Powered Task Management System
Relevant Coursework: Data Structures and Algorithms, Web Systems and Technologies, System Integration and Architecture, Application Development, Systems Analysis and Design, Information Assurance and Security

High School Name   Noveleta, Cavite
Noveleta Senior High School   April 2019

Skills & Interests

Technical Skills
Programming & Application Development: JavaScript, TypeScript, React, Next.js, Node.js, Python
Web Platforms & CMS: WordPress, Shopify, Headless WordPress (REST API), CMS-driven content workflows
Databases & Data Management: MySQL, PostgreSQL, Supabase
DevOps & Deployment: Git, GitLab, VPS deployments, SSH, SFTP, Cloudways, production releases
Styling & UI Implementation: Tailwind CSS, responsive UI implementation from Figma, design systems, wireframing, user flow creation, web design planning
Systems & Technical Operations: Website maintenance and production support, system troubleshooting, internal tool support, process documentation, technical documentation and handover

Language: English, Filipino.

Interests: Building and organizing digital systems and workflows, automation and productivity tools, content creation and continuous technical learning, fitness and lifestyle optimization, technology, startups, and product design
